Cluj-Napoca, Romania

English (Fluent) | Romanian (Native)

PROFESSIONAL SUMMARY

Results-driven Azure DevOps & Cloud Engineer with **7+ years of experience** designing, implementing, and optimizing cloud-native infrastructure solutions. Expert in **Terraform-based Infrastructure as Code** for complex multi-environment Azure deployments. Proven track record building robust **CI/CD pipelines** with Azure DevOps and GitHub Actions, implementing **Security by Design** principles, and managing **Entra ID identity security** including Conditional Access Policies across multi-tenant environments. **Focused experience in Cloud Security** (Entra ID Conditional Access, Privileged Identity Management), with deep expertise in CAP lifecycle management — from policy design and troubleshooting to operational transitions between teams. Strong background in networking, security compliance, and cost optimization. Demonstrated leadership with experience mentoring teams and driving DevOps culture.

CORE COMPETENCIES

INFRASTRUCTURE AS CODE

Terraform, Terragrunt, Bicep, ARM Templates, Ansible

CI/CD & AUTOMATION

Azure DevOps Pipelines, GitHub Actions, Python, Bash, PowerShell, Azure CLI

SECURITY & COMPLIANCE

Entra ID, Azure Key Vault, RBAC, PIM, Conditional Access Policies, MFA, Azure Policy, IaC and Pipeline Security (Checkov, Terratest, SonarQube)

OBSERVABILITY

Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana, Alerting

NETWORKING & SECURITY

VNets, NSGs, VPN Gateway, Azure Firewall, ExpressRoute, Load Balancers, TLS

CONTAINERS & COMPUTE

Azure Kubernetes Service (AKS), Container Instances, ACR, VMs, App Services

TECHNICAL SKILLS

IaC

Terraform (Expert), Terragrunt, Bicep, ARM Templates

CI/CD

Azure DevOps (YAML), GitHub Actions, Jenkins

Scripting

Bash, Python, PowerShell, Azure CLI

Security

Entra ID, Conditional Access, Key Vault, RBAC, PIM, OAuth 2.0, SAML

Monitoring

Azure Monitor, Log Analytics, App Insights

Networking

VNets, NSGs, VPN, Firewall, ExpressRoute

Containers

AKS, Container Instances, Container Registry

AI/ML

Azure OpenAI Service, Cognitive Search, Azure AI Foundry

Compute

Azure Virtual Machines, Azure App Services, Azure Functions

Virtualization

Azure Virtual Desktop, Citrix, VMware

Download CV

PROFESSIONAL EXPERIENCE

DevOps Consultant | Azure Cloud Engineer

June 2023 – Present

Uniq IT Services Wien | B2B Contractor

- Architect and maintain complex Azure environments using **Terraform and Terragrunt**, managing VNets, NSGs, VPN across multi-environment setups (dev/staging/prod)
- Integrate automated testing with **Checkov, Terratest, and SonarQube** ensuring secure, compliant infrastructure code
- Design and optimize **Azure DevOps and GitHub Actions** pipelines for streamlined CI/CD delivery
- Manage **Azure Key Vault** with secret rotation; configure **RBAC and PIM** for least-privilege access
- Develop **Terraform modules** for automated management of **Entra ID Conditional Access Policies** across multiple tenants; implement MFA, Named Locations, and Sign-in Risk conditions; enforce compliance via Azure Policy and Blueprints
- Lead the **operational transition of Conditional Access Policy management** from DevOps to Cyber Security team: audit existing policies, author runbooks and handover documentation, conduct knowledge-transfer sessions, and ensure zero-disruption cutover
- Perform ongoing **CAP maintenance**: troubleshoot access failures, implement new policies aligned with evolving security requirements, and continuously improve existing policies based on sign-in risk analytics
- Lead monitoring with **Azure Monitor, Log Analytics, and App Insights**; configure alerting for 24/7 service health
- Design and implement an automated **Landing Zone provisioning tool** in Azure covering end-to-end onboarding: Subscription Creation, Azure DevOps Project Creation with security groups, **Identity & Access Management** via Terraform Modules, SPN Creation, Key Vault setup, Firewall Rules implementation, and integrated security scanning with **SonarQube and Checkov**
- Architect and deliver an **Azure Virtual Desktop (AVD)** solution — including infrastructure design, full deployment, and end-to-end automation of provisioning and scaling workflows
- Support **Data Management** initiatives by provisioning and managing infrastructure for **Azure Data Factory** and **Azure Databricks** pipelines, ensuring secure networking, RBAC, and CI/CD integration for data workloads
- Implement **multi-environment deployments** using **Terragrunt** for consistent, DRY infrastructure management across dev/staging/prod
- Create technical documentation and **Root Cause Analysis (RCA)** reports for incident resolution
- Collaborate with development teams to integrate CI/CD best practices into SDLC

DevOps Engineer / Team Lead

November 2020 – June 2023

Archive360

- Orchestrated Azure deployments using **Bicep and ARM Templates** for diverse client requirements, including **Azure AD / Entra ID** policy configurations and identity governance
 - Conducted **capacity planning and cost optimization** for efficient Azure SKU utilization
 - Designed **Azure DevOps YAML pipelines**; deployed and managed **AKS clusters** for containerized apps
 - Managed **Azure Policy and Blueprints** for compliance and governance
 - Implemented **Azure Backup** with Recovery Services Vaults for geo-redundant disaster recovery
 - Managed **incident response within SLAs (P1-P4)**; led stakeholder communications during outages
 - Promoted to **Team Lead** (Sept 2022), leading and mentoring a team of 7 engineers
-

Endava

- › Executed **IaaS to PaaS migrations** including Sitecore, reducing operational overhead significantly
- › Built CI/CD pipelines using **Jenkins and Azure DevOps** for efficient software delivery
- › Delivered end-to-end solutions using Azure IaaS/PaaS ensuring scalable, resilient architecture
- › Managed **Azure Monitor and Log Analytics** for performance and reliability management

EDUCATION

Technical University of Cluj-Napoca

Faculty of Electronics, Telecommunications & IT

Networking, Programming (C/C++, C#, Java),
Telecommunications

ADDITIONAL

- **DevOps Internship** – Endava (2018): AWS, Git, Jenkins, Bash
- **Azure AI:** Azure OpenAI Service, Cognitive Search
- Strong problem-solving and troubleshooting expertise
- Technical documentation and RCA report experience
